ASSIGNMENT 4

Q7: Login Form Validation using RegExp

Instructions: Save JavaScript-only solutions as `.js` files and run with Node.js. For form questions, save the full code as `.html` and open it in a browser. No frameworks are used.

Solution

```
<!DOCTYPE html>
<html lang="en"><head><meta charset="UTF-8"><meta name="viewport" content="width=device-width,initial-scale=1">
<title>Login Validation</title><style>body{font-family:Arial;max-width:450px;margin:30px auto}label{display:block;margin:12px 0}input
<body><h1>Login</h1><form id="login" novalidate>
<label>Username<input id="username"></label><label>Password<input id="password" type="password"></label><button>Login</button></form>
<script>
const usernameRe=/^.{5,}$/;
const rules=[
 [/^.{8,}$/,"Password must be at least 8 characters."],
 [/[0-9]/,"Password must include a number."],
 [/[A-Z]/,"Password must include an uppercase letter."],
 [/[a-z]/,"Password must include a lowercase letter."],
 [/[^A-Za-z0-9]/,"Password must include a special character."]
];
document.getElementById("login").addEventListener("submit",e=>{
 e.preventDefault();const username=document.getElementById("username").value,password=document.getElementById("password").value,error
 if(!usernameRe.test(username))errors.push("Username must be at least 5 characters.");
 rules.forEach(([re,msg])=>{if(!re.test(password))errors.push(msg);});
 const out=document.getElementById("message");out.className=errors.length?"error":"success";
 out.textContent=errors.length?errors.join(" "):"Validation successful!";
});
</script></body></html>
```

Expected result / testing

Try a username with at least 5 characters and a password with 8+ characters, uppercase, lowercase, number and special character.
