ASSIGNMENT 2 — Q2 — String Manipulation Report

Instructions: Save this solution in its own .js file. Run it in Node.js or the browser console.

```
"use strict";
const productName = " wireless headphones PRO ";
const trimmed = productName.trim().toLowerCase();
const titleCase = trimmed.split(" ")
  .map(word => word.charAt(0).toUpperCase() + word.slice(1))
  .join(" ");
const cleanedTitle = titleCase.replace(/Pro/i, "Pro Edition");
console.log(`Original: "${productName}"`);
console.log(`Cleaned title: "${cleanedTitle}"`);
console.log(`Title length: ${cleanedTitle.length}`);
```

Explanation: trim() removes outer spaces; split(), map(), and join() capitalize each word; replace() changes Pro to Pro Edition; length gives the final string length.
