ASSIGNMENT 2 — Q9 — Odd–Even Number Analyzer

Instructions: Save this solution in its own .js file. Run it in Node.js or the browser console.

```
"use strict";
const numbers = [];
const results = [];
for (let number = 1; number <= 30; number++) {
  numbers.push(number);
  let label;
  if (number % 3 === 0 && number % 5 === 0) label = "FizzBuzz";
  else if (number % 2 === 0) label = "Even";
  else label = "Odd";
  results.push({ number, result: label });
  console.log(`${number}: ${label}`);
}
console.log("All results:", results);
```

Explanation: The loop generates 1–30. FizzBuzz is checked first for multiples of both 3 and 5; other even values are Even and the rest are Odd.
