ASSIGNMENT 1 — Q1

Personalized Login Greeting

JavaScript solution

```
// Q1: Personalized Login Greeting
"use strict";

const userName = "Mohit";
const currentHour = new Date().getHours();

let greeting;

if (currentHour < 12) {
    greeting = `Good Morning ${userName}!`;
} else if (currentHour <= 17) {
    greeting = `Good Afternoon ${userName}!`;
} else {
    greeting = `Good Evening ${userName}!`;
}

console.log(greeting);
```

Logic: Uses the current hour to choose a greeting and a template literal to include the user's name.

How to test: Save this code as a .js file and run it with Node.js using `node filename.js`, or paste it into the browser console.
