ASSIGNMENT 1 — Q5

Weather Activity Planner

JavaScript solution

```
// Q5: Weather Activity Planner
"use strict";

const temperature = 24;
const isRaining = false;
const windSpeed = 12;

let advice;
if (isRaining) {
    advice = "Stay indoors with hot coffee.";
} else if (temperature > 35) {
    advice = "Go swimming.";
} else if (temperature < 15 && windSpeed > 20) {
    advice = "Too cold and windy — stay home.";
} else {
    advice = "Perfect day for a walk.";
}

// Example combined condition using && and ||:
const weatherIsUncomfortable =
    isRaining || (temperature < 15 && windSpeed > 20);

console.log(advice);
console.log(`Uncomfortable weather: ${weatherIsUncomfortable}`);
```

Logic: Applies the required priority order and demonstrates combined logical OR/AND conditions.

How to test: Save this code as a .js file and run it with Node.js using `node filename.js`, or paste it into the browser console.
