ASSIGNMENT 1 — Q8

Employee Salary Projection

JavaScript solution

```
// Q8: Employee Salary Projection
"use strict";

let currentSalary = 40000;
const annualIncrementRate = 8; // percent
const salaryRows = [];

for (let year = 1; year <= 5; year++) {
    currentSalary *= 1 + annualIncrementRate / 100;
    currentSalary = Math.round(currentSalary);

    salaryRows.push({
        Year: year,
        Salary: currentSalary
    });
}

console.table(salaryRows);
```

Logic: Applies the annual increment once per year for five years and records rounded salaries in a console table.

How to test: Save this code as a .js file and run it with Node.js using `node filename.js`, or paste it into the browser console.
